Conference on Sustainable Urban and Rural Infrastructure Solid Waste Management PPPs for Municipalities and Regions

March 12-13, 2013, Ararat Park Hyatt Moscow

International Finance Corporation (IFC) and the International Bank for Reconstruction and Development (IBRD), members of the World Bank Group, are organizing this global conference. Whilst the primary audience is Russia's federal, regional and municipal authorities, delegates from many other countries will be attending.

The main purpose of the Conference is to disseminate knowledge and raise awareness in relation to sustainable solid waste management via public-private partnerships (PPPs) - given the solid waste management challenges faced by state authorities due to rapid urbanization and the need for sustainable rural development.

Independent technical and legal experts in solid waste management, private and public finance institutions, private sector solid waste management service providers and investors have also been invited to participate.

The Conference will be an excellent forum to meet with key global stakeholders in the sector. For state authorities (including municipalities), the event will provide an opportunity to network with peers and discuss the many challenges facing the sector and sustainable PPP possibilities with experts, financiers and service providers.

The Conference will be in Russian and English (with simultaneous wireless translation on March 12), and it will be moderated by Mr. Jeetendra Marcelline from the global IFC Solid Waste PPP Team.

World Bank Group in cooperation with DevCo, Republic of Austria and Republic of Finland:
